Articulating Arm Bench Top Stand

The Articulating Arm Bench Top Stand is designed to hold the Standard Par Clip and The Universal PAR Clip. Both Clips have a standard tripod thread mount (1/4" - 20).

When used with a PAR Clip it can be used for quenching and quenching relaxation measurements, the stepped actinic test, or for plant monitoring over time.

Unlike standard tripods, this unit has the capability to adjust to any angle.

Features:

- The base is made of painted steel.
- All joints adjust and are locked with a single knob.
- This unit comes with a 1/4" 20 thread mount.
- At full extension the stand is 10" tall.
- Weighs 3 lbs without the PAR Clip

PAR clips are sold separately.
