70 Hour Battery Belt

The 70 Hour Battery Belt is designed for extended field applications when one needs more than the standard OS5p 20 hour lithium ion battery .

This belt will operate at a 3mA level for more than 70 hours. If the OS5p is used for specialized applications at somewhat higher levels, the charge will not last as long. The belt is not intended to act as a charger for the OS5p.

High Rate Panasonic Starved Electrolyte Cells are used in this low-profile slim line design. Auto-reset circuit breaker protection and an automatic shut-off charger are provided.

It also comes with a meter to allow the monitoring of charge level.

An OS5p adapter is included along with a six foot connection wire.

Waist size range: 28" to 50" .

Weight: 16 lbs.

26 hour charge time.

Charger : Cigarette lighter adapter is included. Specify Country for AC adapter.
